

Skin Disease Classification

Model Evaluation Report

Evaluation Metrics

Metric	Value
Accuracy	72.39%
Precision	68.35%
Recall	72.39%
F1 Score	68.21%
ROC-AUC	83.49%

Performance Summary

The final EfficientNetB0 model demonstrated strong classification performance on the HAM10000 skin lesion dataset. The model achieved 72.39% accuracy while maintaining balanced precision, recall and F1-score. ROC-AUC score of 83.49% indicates good discrimination between disease classes.

Evaluation Techniques

- Train / Validation / Test Split
- Classification Accuracy
- Precision
- Recall
- F1 Score
- ROC-AUC
- Confusion Matrix
- Grad-CAM Explainability
